STATE ROUTE 91 HOV PROJECT UPDATE **ARLINGTON AVENUE TRAFFIC SWITCH - PART TWO**

Riverside – The California Department of Transportation (Caltrans) continues work on the six-mile, \$232 million high-occupancy-vehicle (HOV) lane project on State Route 91. Construction is currently on-going to lower Arlington Avenue in order to increase vertical clearance and widen the Arlington Avenue overpass on SR 91, as well as to add a signal light at the Indiana and Arlington Avenue intersection. Due to this work, all traffic has been moved to the east side of Arlington Avenue for several months. Now work will need to be performed to complete the other side of the roadway and traffic will be shifted to the east side of Arlington Avenue.

Beginning Friday, September 13th at 9:00 PM and continuing through Monday, September 16th at 6:00 AM, Indiana Avenue will be closed at Arlington Avenue in order to complete the intersection. Arlington Avenue will also be fully closed in both directions between Riverside Drive and Maude Street from Sunday, Sept 15th at 10:00 PM to Monday, September 16 at 6:00 AM in order to prepare the roadway for the traffic shift. When Arlington Avenue re-opens on Monday morning, motorists will be driving on the west side of the road.

Use alternate routes whenever possible and schedule extra time for travel through the construction project.

Check www.91HOVProject.com for regular updates, detour information, and pictures of the project.

www.caltrans8.info and click on “News and Document Center.” Sign up to receive Commuter Alerts automatically in your email while there. Thank you for your patience as Caltrans and RCTC work to improve the State Route 91.
